Leaders in the field of research ethics and education will provide you with information, strategies, and extensive curricular resources to help you provide training in research ethics, including topics relevant to NIH and NSF mandates.

Learn interactive approaches for providing instruction that will engage and stimulate your audience.

A variety of sessions will allow both novice and experienced teachers of research ethics to benefit.

The conference is relevant to instructors in all research-oriented fields who will be providing training in research ethics to individuals ranging from undergraduates to faculty and staff.

Enrollment is limited and participants are selected competitively. Applications will be accepted on a rolling basis until all positions are filled. Limited financial aid may be available. See our website for details: www.skillsandethics.org.

Immediately prior to this event is the ORI conference **Quest for Research Excellence 2012** to be held March 15-16, 2012 in Washington, D.C.
